reCOVERme

One trusted person to protect, recover and clean up your digital life.

Phones get lost. Accounts get locked. Your personal information is for sale. Most people only find out when it's too late.

PROTECT

Automatic backups of your photos and documents, stored privately in more than one place, and watched so you know they work.

RECOVER

Locked out or hacked? I help you get back in, and find and close the old accounts you forgot you had.

CLEAN UP

I request removal of your information from people-search sites and show you what the internet knows about you.

ENFORCE

When someone takes your photos or content, I help get it removed. When you need facts, I research public sources.
