THE FAMILY SAFETY NET

Getting started is simple.

This is the easiest way for you to complete the install and setup.

YOUR CHOICE marks the moments where you decide how it goes.

1

You and I talk

We communicate the way that suits you.

Text | Email | Call

2

We decide what your goals are

YOUR CHOICE

Together we work out what you actually need.

- [ ] Just a primary and a secondary sync?
- [ ] A sync and a backup?
- [ ] A backup of your social media accounts?
- [ ] A snapshot of your current device?
- [ ] How involved do you want to be?
- [ ] Manage your data yourself, or have it managed for you?

3

We create an onboarding plan

A clear, written plan for what gets set up and in what order.

4

We schedule a time to put it all in place

YOUR CHOICE

One session to put all the pieces together. Before we start, we decide:

Do you want to be involved, or do you want me to just get it done for you?

I want to be involved | Just get it done

5

We review the plan and next steps

YOUR CHOICE

Now that we've put your solution in place, what's next? We need to decide:

- [ ] One and done? You've got this.
- [ ] Let's check back in a few months?
- [ ] I need help. Let's make a plan.
- [ ] I just need it to work. Make it happen.

Based on your data footprint and needs, we determine which solutions are best for you.
