Account Inventory Worksheet

List every online account you can think of. The goal is a complete map, so don't worry about being tidy.

How to use it

1. Go to the Accounts tab. Cells with a pale yellow fill are for you to type in. The grey italic row is an example only.

2. Use the Memory Jogger tab to prompt yourself. Check old email inboxes for 'Welcome', 'Verify your email' and 'Receipt' messages.

3. Use the drop-down lists where they appear. Leave anything you don't know blank or choose 'Unknown'.

4. The Summary tab updates by itself. It shows how many accounts you have, which have no second factor, and what you want done.

About passwords (please read)

This worksheet deliberately has no password column. A file that lists every account, username and password is the single most valuable thing a thief or hacker could find.

Instead, record WHERE each password is kept (password manager, memorised, paper, browser). Keep the actual passwords in your password manager.

If you decide to write passwords down anyway, do it by hand on a printed copy, keep it sealed in a safe place, and never type it into a file that is synced to a cloud or emailed.

Keep this file safe

Even without passwords, this lists your usernames, email addresses and where you're weak (for example, no second factor). Store it in an encrypted folder or your password manager's secure notes, and don't email it unprotected.

Column guide

Status: Active = you log in fine. Dormant = still exists, you rarely use it. Locked / can't access = you can't get in. Unknown = you're not sure it still exists.

Action wanted: Keep = leave as is. Review = decide later. Close = delete or deactivate it. Recover = get back in. Back up = save the contents first. Find = track down an old or forgotten account.

Has data worth saving: photos, messages, documents or purchases you couldn't replace. Anything marked Yes should be backed up BEFORE you close the account.

Account Inventory

Type in the yellow cells. Grey italic row 5 is an example only (it is not counted). Do not type passwords here.

#	Account / service	Category	Username / login	Email used	Phone # on account?	Password kept in	Second factor (2FA)	Recovery email / phone set?	How often used	Status	Action wanted	Has data worth saving?	Notes	Date reviewed

Summary

Updates automatically from the Accounts tab.

Overview		
Accounts listed	**0**	
No second factor (2FA)	**0**	*Add 2FA, starting with email and banking.*
Second factor: unsure	**0**	
Password NOT in a password manager	**0**	*Move these into the password manager.*
No recovery email or phone set	**0**	*Without recovery options, a lockout is much harder to fix.*
By status		
Active	**0**	
Dormant	**0**	
Locked / can't access	**0**	
Unknown	**0**	
By action wanted		
Keep	**0**	
Review	**0**	
Close	**0**	
Recover	**0**	
Back up	**0**	
Find	**0**	
Priority checks		
Close, but has data worth saving	**0**	*Back these up BEFORE closing.*
Locked and not yet marked Recover	**0**	*Decide whether to recover or close.*
Unknown status	**0**	*Candidates for the 'Find' list.*

Memory Jogger

Prompts to help you remember accounts. Add each one to the Accounts tab.

Email	Every email address you've ever had: current, old, school, work, ISP, Hotmail/Yahoo/AOL, Gmail, iCloud.
Banking & money	Banks, credit unions, credit cards, loans, mortgage, PayPal, Venmo, Cash App, Zelle, crypto exchanges, brokerage, retirement, HSA, tax software.
Shopping	Amazon, eBay, Etsy, Walmart, Target, Best Buy, local stores, loyalty and rewards programs, food delivery, grocery, pharmacy.
Social media	Facebook, Instagram, X, TikTok, Snapchat, Pinterest, Reddit, LinkedIn, YouTube, Tumblr, MySpace, Flickr, old forums.
Messaging	WhatsApp, Telegram, Signal, Discord, Slack, Messenger, Skype, Zoom.
Cloud & files	Google Drive, iCloud, Dropbox, OneDrive, Mega, Box, Evernote, Notion, Adobe.
Photos	Google Photos, Amazon Photos, Shutterfly, Flickr, Snapfish, photo-printing sites, old phone cloud accounts.
Work / school	Employer portals, school and university accounts, alumni systems, online courses, professional associations.
Health	Doctors' portals, hospital MyChart, pharmacy, insurance, dental, fitness trackers, Apple Health, Fitbit, Garmin, Strava.
Government / utilities	IRS, Social Security, DMV, state tax, voting, library, electric, gas, water, internet, phone carrier, trash.
Travel	Airlines, hotels, rental cars, Airbnb, Uber, Lyft, booking sites, frequent-flyer programs, travel apps.
Entertainment	Netflix, Disney+, Hulu, Spotify, Apple Music, Audible, Kindle, Steam, PlayStation, Xbox, Nintendo.
Devices & apps	Apple ID, Google account, Microsoft account, Samsung, smart-home apps, router, printer, security cameras, car apps.
Other	Dating apps, old websites you built, domain registrars, hosting, newsletters, petition sites, forums, hobby sites.
